READ PenQuantity, NotebookQuantity, PaymentTotal,

PenTotal = PenQuantity*12

NotebookTotal = NotebookQuantity*45

TotalPrice = NotebookTotal + PenTotal

Change = Payment - TotalPrice

DISPLAY TotalPrice, Change

END

Test Case	Notebooks	Pens	Payments
1	3	2	₱200
2	2	3	₱150

Test Case 1

NotebookTotal = $3 \times 45 = 135$

PenTotal = $2 \times 12 = 24$

TotalPrice = $135 + 24 = 159$

Change = $200 - 159 = 41$

Output: TotalPrice = 159, Change = 41

Test Case 2

$$\text{NotebookTotal} = 2 * 45 = 90$$

$$\text{PenTotal} = 3 * 12 = 36$$

$$\text{TotalPrice} = 90 + 36 = 126$$

$$\text{Change} = 150 - 126 = 24$$

Output: TotalPrice = 126, Change = 24
